SUMMARY

AI engineer and full stack developer who builds and ships production AI features. Experience with LLM integrations, retrieval-augmented generation (RAG) pipelines, and agentic workflows, backed by FastAPI, Node.js, React, Next.js, and Firebase. Uses AI-assisted development daily to move from UI to backend to AI integration quickly, owning features end to end.

EXPERIENCE

Full Stack Developer

May. 2026 – Present

Leminno

Remote

- Contributed to SaaS products at Leminnno, including mobile app features built with Kotlin and Jetpack Compose
- Implemented multiplayer flows using tilt sensors and multi-touch input
- Integrated AI-powered features and Firebase services into production mobile app functionality

Front-End Developer

May 2025 – Nov. 2025

SEEQLO

Remote, Canada

- Built and maintained a production AI-powered educational platform using React, Tailwind CSS, and Firebase
- Implemented responsive, structured content delivery UI serving live users at seeqlo.com
- Integrated Firebase backend services to support authentication and dynamic content

Web Developer Intern

Jan. 2025 – May 2025

The Vista

Islamabad, Pakistan

- Developed features for an HR SaaS product (Vista HRMS), focusing on API integration and responsive UI
- Collaborated with the engineering team to ship functionality in a production web application

PROJECTS

Car Khana | *Next.js, Node.js, CSS*

car-khana.vercel.app

- Built the front end and back end from scratch for a local rent-a-car business's website
- Designed a custom responsive UI with CSS for car listing, detail, and dashboard pages

TEDx PIEAS | *Next.js, CSS*

ted-x-pieas.vercel.app

- Developed the official TEDx PIEAS event website with a modern, responsive UI
- Built smooth CSS-driven animations for event showcasing sections

TECHNICAL SKILLS

AI / LLM: RAG Pipelines, Embeddings & Vector Search, Agentic Workflows, Tool / Function Calling, LLM API Integration, Prompt Engineering, AI-Assisted Development

Languages: Python, JavaScript, C, Java, HTML, CSS

Backend: FastAPI, Node.js, REST APIs, Firebase, MongoDB, Shopify Liquid

Frontend: React, Next.js, Tailwind CSS, Bootstrap, CSS (responsive layout, animation)

DevOps: CI/CD, Docker (basic)

QA: QA Testing

Tools: Git, VS Code, AI IDEs (Cursor, GitHub Copilot)

Coursework Projects: Cannon Game (C), Rush Hour Game (Java, OOP)

Certifications: Google AI Essentials Specialization (Google)

Languages Spoken: Urdu (Native), English (Fluent)

EDUCATION

Pakistan Institute of Engineering and Applied Sciences (PIEAS)

Islamabad, Pakistan

BS in Computer Science

FG Sir Syed College

Rawalpindi, Pakistan

Higher Secondary Certificate
